

# Ecolean's aseptic packaging solutions support the first company in Indonesia to receive Class A Aseptic certificate

J A K A R T A ,   I N D O N E S I A   -   2 0 2 0 - 0 3 - 2 6

The global packaging supplier, Ecolean recently received one more proof pointing to the high standards of their unique aseptic, lightweight packaging. The Indonesian customer SoGoodFood becomes the first company in the country to receive the Class A certificate in the Aseptic category.

The National Agency of Drug and Food Control in the Republic of Indonesia recognised food and beverage manufacturer SoGoodFood's products consisting of Flavoured UHT milk drinks in Ecolean's lightweight packages as Class A in the Aseptic category – the first company in Indonesia to receive this highly respected certificate. The final result is heavily supported by the high standards of Ecolean packaging's sterility test results, leading to the agency wanting more information on the aseptic packages benefits relating to food safety and sterilization methods.

"When we launched our first aseptic packaging solution for ambient distribution in 2008, we were one of the first packaging suppliers to use e-beam technology as a sterilization method, which ensures that food contact surfaces are never exposed to any chemicals during the production or filling. It was groundbreaking at that time and we are still leading this development," says Paul Mellbin, Senior Advisor, Ambient Technology, Ecolean Group.

During February, Paul Mellbin and local Ecolean representative Doni Kurniadi held an introduction to Ecolean Aseptic Technology at the National Agency of Drug and Food Control in the Republic of Indonesia. The main objective of the session was to improve the knowledge of the agency's inspectors when it comes to new product registration and post-market inspection for aseptic packages.

"The National Agency of Drug and Food Control was delighted to obtain an even deeper knowledge of our unique aseptic technology using e-beam, since this was totally new information for them," explains Doni Kurniadi, Ecolean Indonesia. And continues "It's nice to hear that SoGoodFood, has become the first company in Indonesia receiving the Class A certificate for Aseptic category. We work in partnerships with our customers and celebrate their success."
